PRATYUSHA MAITRA

SOLUTIONS ARCHITECT

Cloud Transformation | Enterprise Integration | Delivery Leadership

---

International MBA | Experience across FinTech, Robotics and Renewable Energy

Architecting secure, scalable enterprise solutions and aligning technology choices with business outcomes. Germany-focused portfolio for architecture, cloud transformation and technical delivery positions.

SELECTED STRENGTHS

- Azure and GCP cloud environments, IAM and Entra ID
- Dynamics 365, Business Central, Power BI Embedded and data integration
- Solution architecture, roadmaps, stakeholder workshops and Agile delivery
- DevOps, Terraform, CI/CD, APIs and integration governance

Note: Case studies are high-level summaries; client confidential details are intentionally excluded.

EXECUTIVE PROFILE

Solutions Architect and technology delivery professional with experience designing and coordinating cloud, ERP/CRM, data integration and digital platform initiatives. Combines technical breadth with stakeholder communication, architecture documentation and practical delivery leadership. Experienced across financial services, robotics and renewable energy.

SELECTED CAREER IMPACT

- Approximately 5% monthly cloud cost reduction reported at Fremsyn.
- Approximately 15% year-on-year DevOps savings reported at Blue Ocean Robotics.
- Stakeholder engagement with 12 client leadership teams in renewable-energy projects.
- Sustainability reporting solution connected Business Central and Power BI Embedded.
- Approximately 12% resource-billing cost reduction reported across Cognizant projects.

CORE CAPABILITIES

Cloud & security

Azure, GCP, Terraform, Entra ID, IAM, SSO, CI/CD and cloud cost optimization.

Enterprise applications

Dynamics 365, Business Central, Power BI Embedded, Azure Data Factory, APIs and SQL.

Architecture leadership

Requirements discovery, architecture options, roadmaps, integration design, delivery governance, stakeholder workshops and documentation.

SELECTED CASE STUDIES

01 Enterprise Sustainability Reporting

Renewable energy | Fremsyn ApS

Integrated Microsoft Dynamics 365 Business Central with Power BI Embedded to support consumption reporting and business decision-making.

Contribution: Solutions architecture, integration design, go-live coordination and stakeholder alignment.

Technology: Business Central, Power BI Embedded, Azure, stakeholder engagement

Outcome: Reported 20% year-on-year business growth associated with the wider solution and delivery work.

Commercial experience; impact is contextual, not solely attributable to one system.

02 Azure Cloud & Identity Modernization

Renewable energy | Fremsyn ApS

Developed cloud and identity architecture practices emphasizing secure access, delivery automation and cost-conscious operations.

Contribution: Cloud strategy, architectural decision-making, security alignment and delivery governance.

Technology: Azure, Microsoft Entra ID, SSO, Terraform, DevOps

Outcome: Approximately 5% reduction in monthly cloud-related costs, as previously reported.

Commercial experience; infrastructure details generalized for confidentiality.

03 Robotics SaaS & DevOps Delivery

Robotics | Blue Ocean Robotics

Supported connected robotics applications spanning web and mobile interfaces, APIs and cloud deployment workflows.

Contribution: Senior engineering, Scrum facilitation, cross-functional delivery and mentoring.

Technology: GCP, Docker, GitHub Actions, React, Node.js, TypeScript, REST APIs

Outcome: Reported approximately 15% year-on-year savings from sustainable DevOps practices.

Commercial experience; generalized architecture rather than proprietary implementation.

04 Banking Platform Integration & Reliability

Financial services | Cognizant

Contributed to banking applications and integration workflows across cards, payments, mortgages and digital banking environments.

Contribution: IT lead engineering, requirements analysis, testing, production support and delivery coordination.

Technology: SAP banking, Java, Oracle, SQL, test automation, CI/CD

Outcome: Reported approximately 12% reduction in resource-billing costs across multiple projects.

Commercial experience; client-specific designs and data excluded.

05 Data Mapping & Integration Design

Independent demonstration project

A portfolio demonstration that compares source and target schemas, documents mapping rules and identifies data-quality and integration risks.

Contribution: Solution concept, data mapping design, validation rules, architectural documentation and demo planning.

Technology: Python, CSV/Excel-style data, schema comparison, mapping specification, governance

Outcome: Demonstrates repeatable integration-design thinking; no commercial outcome claimed.

Independent prototype / demonstration; not presented as a production customer deployment.

CAREER HISTORY

Independent Consultant | EU remote

Recent / current consulting: requirements discovery, cloud migration, data integration, process automation, Azure Data Factory and Terraform.

Fremsyn ApS | Solutions Architect | Jan 2023 - May 2025

Copenhagen, Denmark. Sustainability reporting, Azure strategy, identity, CRM/ERP integration, stakeholder leadership and client go-live.

Blue Ocean Robotics | Senior Software Engineer | Jun 2021 - Nov 2022

Odense, Denmark. Robotics SaaS applications, APIs, cloud DevOps, Scrum facilitation and mentoring.

Cognizant | IT Lead Engineer | Nov 2011 - Jul 2019

India. Banking platforms, cards and payments, mortgages, testing, production support and delivery coordination.

EDUCATION & PROFESSIONAL DEVELOPMENT

International MBA; Scrum Certified Product Owner (as reported in professional background).

German-market focus: Solutions Architect, Enterprise Architect, Cloud Transformation, Business Applications Architect and Technical Delivery Lead.

PUBLICATION NOTES

Review dates, certification names, outcome figures and project descriptions against your latest CV and employer-approved evidence before public publishing. Avoid uploading client diagrams, code, customer data or internal documents.
